

MyPA

Your Personal & Business AI Assistant

User Guide

Version 1.0
20 July 2026

Welcome to MyPA

MyPA is your AI-powered assistant for social media marketing — built for individuals, social media consultants, and business teams alike. This guide walks you through everything from your first sign-in to managing multiple clients or a whole team's content, on your phone, tablet, or computer.

Everywhere you see the  icon, that's a tip from people who use MyPA daily. Everywhere you see , that's something worth knowing before you continue.

Contents

1. Getting Started
2. Creating Your First Post
3. Speaking Instead of Typing
4. Using the Prompt Library
5. Turning One Post Into Five
6. Scheduling & Your Content Calendar
7. Managing Multiple Clients (Consultants)
8. Working as a Team (Business Accounts)
9. Connecting Your Social Accounts
10. Understanding Your Plan
11. Getting Help

1. Getting Started

1. Download MyPA on your phone, tablet, or computer — the app looks and works the same everywhere, so pick up right where you left off on any device.
2. Sign up with your email, or continue with Google or Apple for a one-tap start.
3. Tell MyPA how you'll use it: as an Individual, or as a Consultant/Business managing multiple clients or a team.

 **Note:** You can change how you use MyPA later in Account settings, but choosing accurately now sets up the right workspace structure from day one.

2. Creating Your First Post

MyPA's Create screen walks you through three simple steps — no marketing background required.

1. Describe your idea. Type it, or tap the microphone and just say it out loud.
2. Pick a tone: Friendly, Professional, Bold, or Witty.
3. Review the AI draft. Regenerate if it's not quite right, or tap 'Use this' when you're happy.

 **Tip:** The more specific your idea, the better the draft. "Write about our sale" works, but "write about our 20%-off summer sale for returning customers" works better.

 **Note:** AI-powered content generation is available on Pro and Business plans. The Free plan covers manual posting and organization without AI — see Section 10 for what's included at each level.

3. Speaking Instead of Typing

Anywhere you see the microphone icon, you can speak instead of type — describing a post idea, adjusting a draft, or even asking MyPA to read a draft back to you before you approve it.

1. Tap the microphone icon.
2. Speak naturally — MyPA transcribes as you go.
3. Tap Done, or Cancel to start over.

 **Tip:** If a transcription comes out slightly wrong, it's usually quicker to fix the text by hand than to re-record from scratch.

4. Using the Prompt Library

Not sure where to start? The Prompt Library has ready-to-use templates organized by goal: Engagement, Sales, Awareness, and Brand Voice.

1. Open Library from the main navigation.
2. Filter by goal, or search for a topic.
3. Tap 'Use' on any prompt to load it into Create, then customize the details.

A full categorized list of every built-in prompt, with guidance on writing your own, is in the companion Prompt Library document.

5. Turning One Post Into Five

MyPA can adapt one idea into versions tailored for each platform — Instagram, Facebook, LinkedIn, X, TikTok, and YouTube — in a single tap.

1. From any draft, tap Repurpose.
2. Choose which platforms you want versions for.
3. Review each platform's draft — captions, tone, and length are automatically adapted per platform.
4. Edit any version you'd like, then add them all to your Calendar.

 **Tip:** Always give each platform version a quick read before scheduling — trends and slang move fast on some platforms, and a quick human check keeps things feeling current.

6. Scheduling & Your Content Calendar

The Calendar shows everything you've drafted, scheduled, and published, across all connected platforms, in one place.

1. From any finished draft, tap Schedule.
2. Pick a date and time, or let MyPA suggest a good time based on when your audience is usually active.
3. Your post publishes automatically at the scheduled time to any connected platform.

 **Note:** If your workspace has approval turned on (common for business teams), scheduled posts wait for an approver before they go out — see Section 8.

7. Managing Multiple Clients (Consultants)

If you manage social media for multiple clients, each client gets their own isolated workspace — separate content, separate brand assets, separate connected accounts.

1. Tap the Workspace switcher at the top of the screen.
2. Select a client, or tap + Add Workspace to set up a new one.
3. Everything you create, schedule, or connect only applies to the client workspace you're currently in.

 **Tip:** Save each client's brand tone once, in that client's Brand Asset Library, so every prompt you use for them automatically matches their voice.

8. Working as a Team (Business Accounts)

Business accounts support multiple team members with different roles: Admin, Manager, Contributor, and Viewer.

Role	Can do
Admin	Everything — manage team members, quotas, approval settings, and all content
Manager	Approve content, manage day-to-day team content, cannot change billing or remove the Admin
Contributor	Create and submit content for approval
Viewer	View content and performance, cannot create or publish

If your workspace requires approval before publishing, a Contributor's scheduled post moves into a Pending queue until a Manager or Admin approves it. You'll be notified either way.

9. Connecting Your Social Accounts

1. Go to Account (or Admin, for team-wide connections) and tap + Add next to Connected Accounts.
2. Choose the platform and log in through the platform's own secure sign-in screen.
3. Once connected, that platform becomes available in Repurpose and Schedule.

i Note: MyPA never sees or stores your social platform password directly — connections use each platform's official secure sign-in process, and access can be revoked at any time from Account settings.

10. Understanding Your Plan

Feature	Free	Pro	Business
AI content generation	Not included	Included	Included
Prompt Library	Not included	Full access	Full access + custom
Voice input/output	Not included	Included	Included
Connected platforms	1 (manual posting)	Up to 5	Unlimited
Client/team workspaces	—	Multiple clients	Multiple teams
Admin console	—	—	Included

i Note: The Free plan is designed to have no AI-related cost, so it's genuinely free to use indefinitely for manual posting and organization. Upgrading unlocks AI generation, voice, and the full Prompt Library.

11. Getting Help

If something isn't working the way you expect, the companion Troubleshooting Guide covers common issues — login problems, publishing failures, quota questions, and more — with step-by-step fixes.

For anything not covered there, reach out through Account > Support, and include what you were trying to do and what happened instead — that's the fastest way to get a useful answer.
